Want to make your home cute?

100x100mm solid-color ceramic mosaics are here to help! Stick them on kitchen oil-proof panels to turn the panels into "colorful guardians"; lay them in the bathroom to make it a "fresh check-in spot". They also work for balconies and foyers, with bright colors, compatibility with various styles, and easy installation.

Outdoor plaza bricks

By applying the "all-through" technology, the brick body is uniform inside and out, dense and pore-free, with excellent acid and alkali corrosion resistance, anti-fouling, moisture-proof and colorless. It is the preferred material for stone curtain walls, providing warmth in winter, sun protection in summer and non-flammability. It is applied to municipal gardens, landscape roads, building squares, high-end garden community commercial squares, municipal public squares, pedestrian streets, high-end office buildings, subways, high-speed railways, schools, hospitals, landscapes, staircases, parking lots, indoor and outdoor areas of homes and other decorative and paving places. It will not undergo the same quality change and weathering as stone, and does not require much maintenance to maintain its beauty. Its diversity and multi-functionality make it your best choice! Through meticulous details, emphasizing the uniform contrast of materials and colors, it strives to simplify the complex and present an overall grand and substantial beauty.
